

EAM Tool Selection

You are looking for the right tool to optimally support your EA function?

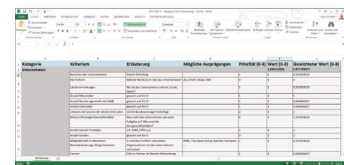

- You would like to obtain a quick overview of the EA tool market?
- You are looking for a comprehensive list of evaluation criteria?
- You intend to carry out a methodologically sound tool evaluation in order to find the most suitable product?

Utilize our „EAM Tool Selection“ service

We assist you in identifying your critical tool requirements, in setting up a list of evaluation criteria, in conducting vendor presentations, and in selecting the most suitable product. Our service is based on various assets including a generic criteria catalogue, a standardized approach on identifying stakeholder requirements as well as extensive experience in EA and EA tooling.

Our approach in detail

- Analyze your stakeholders and their requirements
- Select and prioritize decision criteria from a generic catalogue comprising approx. 125 items
- Prepare a long list based on a predefined list of vendors
- Send out questionnaires based on the selected criteria to the vendors on the long list
- Evaluate the returned questionnaires
- Create a short list based on the evaluated answers
- Develop a showcase
- Moderate vendor presentations based on the showcase
- Evaluate results and derive a decision proposal

Kategorie	Kriterium	Bewertung	Mögliche Ausprägungen	Kriterium 2 (z. B. Wert 1-5)	Kriterium 3 (z. B. Wert 1-5)	Kriterium 4 (z. B. Wert 1-5)
Kriterien	1.1.1.1	1
	1.1.1.2	2
	1.1.1.3	3
	1.1.1.4	4

Your benefit

- Reduce the efforts associated with a tool selection process significantly through the use of our above mentioned assets.
- Benefit from our experience with EA tools deployed in various industry sectors and supporting varying usage scenarios.
- Protect your investments and achieve a high level of tool acceptance by involving vendor neutral subject matter experts.
